Software and Consulting

PETROLEUM CONSULTANCY SERVICES

In the era of increasing economic challenges and needs, the petroleum industry should provide better solutions to optimize field development strategy and new hydrocarbon prospect discovery.

RDA Teknologi Indonesia provides integrated reservoir studies starting from exploration to development that offers:

Exploration:

- Regional Reviews
- Basin Modeling and Play Definition
- Regional Pore Pressure
- Seismic Processing PSTM & PSDM
- Seismic Geology Interpretation
- Prospect Identification and Maturation
- Petroleum System Modeling
- Play Fairway Mapping
- Play Based Exploration
- Deepwater Prospect Evaluation
- Pre-Salt and Pre-Carbonate Analysis

Development:

- Petrophysical Evaluation
- Static Reservoir Modelling
- Fault Seal Analysis
- Dynamic Reservoir Modeling
- Reservoir Simulation
- Quantitative Seismic Interpretation
- Well Design and Technology
- Risk Assessment and Petroleum Economics
- Geomechanics
- Production Network and Optimization
- Integrated Asset Modeling

Drilling:

- Relief Well
- Blow Out Contingency Planning
- Wellbore Positioning
- Real Time Advanced Survey Management
- Passive Magnetic Ranging
- In-Field Referencing

We are constantly looking beyond customers' and society's expectations in order to deliver market leading services wherever they are needed. We provide innovative services and solutions for every part of the oil and gas industry.

OTHER SERVICES

• In-House Software Development

RDA Teknologi Indonesia creates and develops its own software for production data management, daily drilling report, aerated hydraulic system analysis, trajectory design, casing design, and BHA design.

• Geoscience Support and Software Training

RDA Teknologi Indonesia provides onsite support that needed by oil and gas company. Also, geoscience software's training from seismic to simulation disciplines.

• Hardware Solutions

RDA Teknologi Indonesia also provides server, workstation, storage & backup solutions to fulfil clients' need

OUR CONSULTANTS

Our resource of industry-professionals consists of many qualified subject matter experts in the areas of geophysics, petrophysics, reservoir geology and reservoir engineering with local expertise and global knowledge in oil and gas, unconventional reservoir & geothermal industry around 5 up to 20 years.
